Work Experience

Amazon | *Software Development Engineer Intern*

Jan 2023 - June 2023

- Collaborated with cross-functional teams to successfully complete multiple projects.
- Implemented agile software development methodologies and Amazon's leadership principles across all phases of the software development life cycle.
- Developed a variety of customer-centric features, such as populating selected email template to email body, implementing bulk case update capabilities, enabling case cloning, and more.
- Demonstrated proficiency in full-stack development, API development, and documentation skills.
- Produced highly functional and thoroughly tested code to consistently deliver exceptional results.

Evren Global Solutions | *Frontend Developer, UI/UX Designer*

Jan 2022 - Feb 2022

- Collaborated with the team to deliver tailored IT consultancy services.
- Demonstrated expertise by designing and developing an efficient admin dashboard for an eCommerce Logistics Application.
- Enhanced functionality and seamlessly integrated API integrations to optimize overall performance.
- Streamlined dynamic workflow processes to increase productivity and efficiency.

Devlance | *Frontend Developer*

Oct 2021 - Nov 2021

- Developed website frontend for **Loopgem**, an NFT Marketplace.
- Customized user interface using Material UI to enhance the visual appeal and user experience.
- Implemented a streamlined workflow for seamless integration with blockchain technology.

Industry360 | *Full Stack Developer, UI/UX Designer*

Nov 2020 - Feb 2021

- Developed an eLearning platform on WordPress with admin and user dashboards, enabling features such as course management, progress tracking, and certificate generation.
- Designed the website UI using Adobe XD, creating a visually appealing and user-friendly interface.

Volunteer Experience

Office of the United Nations High Commissioner for Human Rights | *Research Analyst, Graphic Designer*

- Collected testimonials and stories from across the country for the Covid-19 best practices.
- Produced high quality creatives for the campaign.

Teens of God (Regd. NGO) | *Social Media Marketing Team Lead*

- Interviewed and led a team of 10 members.
- Worked for the Social media account building of the NGO and participated in various initiatives.

Projects

LinkedIn Redesigning Clone | *ReactJS, NodeJS, MongoDB*

Oct 2021 - Jan 2022

- Developed and implemented a React-based LinkedIn clone with a modern and user-friendly design, showcasing proficiency in front-end web development and UI/UX principles.
- Integrated API endpoints and leveraged MongoDB for seamless data storage and retrieval, demonstrating expertise in backend development and database management for scalable web applications.

IEEE NCU Website | *HTML, CSS, Bootstrap, JavaScript*

Jan 2021 - Mar 2021

- Collaborated as a front-end developer to create the IEEE NCU Chapter website, utilizing HTML, CSS, Bootstrap, and JavaScript to deliver an interactive and visually appealing user experience.
- Implemented responsive design techniques and leveraged Bootstrap framework to ensure seamless compatibility across various devices and screen sizes, enhancing the website's accessibility and usability.
